Work Experience

Optum- UnitedHealth Group

Apr. 2024 – Present

Software Engineer

Gurugram, Haryana

- Developed **AI-powered** healthcare benefits search API using Flask and Python, **integrating Google Vertex AI** for **semantic search across 100K+ benefit documents**
- Developed a **Python-based automation** script to extract **dynamically** located healthcare sections from **unstructured DOCX** files using keyword-based detection and **structured JSON** output generation.
- Designed and implemented a cron job scheduler in Java to automate the periodic update of the remark code table in the database, **reducing manual intervention by 90%** and ensuring consistent data synchronization across the system.
- Resolved 50+** secure and cloud vulnerabilities across multiple services, ensuring the successful deployment of solutions in production environments.
- Improved API reliability by implementing advanced exception handling mechanisms, **reducing error rates by 25%** and enhancing system stability for seamless user interactions.

DabbaX Food Aggregators

Dec. 2023 – Mar. 2024

Software Engineer

Remote

- Implemented MongoDB's geoNear function to calculate real-time distances between users and restaurants, enhancing location-based service accuracy and improving user experience.
- Engineered reusable React Native components, **reducing development time by 25%** and improving code maintainability across the application.
- Created a config-driven UI framework using **React native**, enabling dynamic updates and **reducing deployment time by 30%**

Engagifi- Crescerance

Mar. 2023 – Dec. 2023

Software Engineer Trainee

Remote

- Integrated API payloads into the front-end, enabling real-time content rendering and **improving user interaction efficiency by 25%**.
- Developed a popup module with advanced features like filtering, searching, and pagination, **enhancing user experience and data accessibility by 30%**.
- Spearheaded the creation of a modular UI framework using Storybook and React, enabling rapid iteration of components and slashing front-end deployment cycles by 30%.
- Acquired hands-on expertise in Software Methodologies, Entity Framework, Azure DevOps, Postman, and LINQ, contributing to efficient project delivery and technical growth.

Technical Skills

Programming Languages:	C++, Java, Python
Libraries and Frameworks:	Springboot, React, Node.js
AI Applications:	Prompts using Copilot and OpenAI, LangChain
Databases & Other Technologies:	SQL, MongoDB, PostgreSQL, HTML5, CSS3

Projects

Sorting Visualizer | *HTML, CSS, Bootstrap, Javascript*

[LINK](#)

- Built a sorting algorithm visualizer to demonstrate the working and efficiency of Insertion Sort, Selection Sort, Bubble Sort, Quick Sort, and Merge Sort, enhancing user understanding of algorithmic concepts.

MCA Cube | *HTML, CSS, Bootstrap, Javascript*

[LINK](#)

- Created a web application to serve a repository of useful resources for MCA students at HBTU, Kanpur with **25000+** page views and **1000+** visitors.

Education

Harcourt Butler Technical University

Dec. 2021 – Jul. 2023

Computer Science and Application

CGPA: 8.0

Extracurriculars

- Leadership:** Design Head of Print and Social Media Club Sub-Council - HBTU, Kanpur.
- Talks:** Delivered a virtual talk on **Cybersecurity** at **Aligarh Muslim University**, sharing best practices and threat mitigation strategies with **100+ students**.
- Teachings:** Taught **20+ juniors** the basics of programming and web development.
